Executive Summary

Problem

Airport travelers must choose between cheap and inconvenient public transport or fast and expensive taxi/parking; there is no affordable, convenient, and reliable middle option.

Solution

A premium, app-based, door-to-door e-shuttle connecting Munich districts to MUC called “SHUTTLE by Munich Airport”; reliable, faster and more convenient than public transport, more affordable (32€ average fee) than taxis and private cars.

How can we make it reality?

SHUTTLE operates the service end-to-end under an airport brand license, delivering fast market entry, low risk, and recurring revenue for Munich Airport through a 10% revenue share. Starting with a pilot in Schwabingen and Maxvorstadt.

What’s in it for Munich Airport?

7M Yearly Recurring Revenue (in EUR)

Marketing Campaign Goals

Build awareness of the new transport option in Schwabing-West and Maxvorstadt, convert interest into trial bookings, and reinforce MUC’s positioning as an innovative, sustainable mobility hub.

Target Group

Urban frequent millennial flyers living in Munich (Schwabingen-West & Maxvorstadt), who value convenience and predictability but are price-sensitive vs taxi.

Marketing Campaign Overview

Marketing Campaign Details

Key Message: Vacation starts at your doorstep.

Value Proposition: A smoother, predictable journey that reduces friction while remaining cost-efficient through pooling

Offline

- Branded vehicles: Branded shuttles driving through pilot neighborhoods
- OOH Banners: Posters and banners in stations and on streets

Online

- Instagram & Facebook (Owned + Paid): Service explainers, paid ads, lifestyle content and promo codes
- UGC – #SkipTheDetour: Influencer kick-off, customer stories, social posts, and voucher incentives
- Local content creators: Sponsored posts and discount codes

Bridging the gap between expensive private transport and inconvenient public options

Low Cost, Low Convenience (Public Transport & Lufthansa Express):

Affordable but slow and inconvenient (≈ 75 min incl. waiting, fixed pickup points, capacity constraints).

High Convenience, High Cost (Car/Taxi):

fast and convenient but expensive (≈ €100 taxi, €60–€150 parking).

The Solution: SHUTTL

A premium, app-based pooled shuttle bus service, positioned between expensive private transport and slow conventional options.

MOBILITY CONCEPT

SHUTTTL: App-based shuttle connecting Munich districts to MUC

Service Overview

Door-to-Door: Passengers are collected directly from home or hotel curb.

App-Based Pooling: Trips are pre-booked via an app. Intelligent routing minimizes detours while maximizing vehicle occupancy.

Small, Electric Fleet: We use flexible, 8 - 16 seater electric minibuses/shuttles.

Target Group: Efficiency & Convenience Seekers (Age 30-39, Middle/Upper-Middle Income).

Value Proposition

Convenience:
Door-to-Door Service
Time Efficiency:
Optimized Routing
Affordability:
Cheaper than Car and Taxi

A fully outsourced brand license model offers the greatest flexibility and revenue for Munich Airport

Operating Structure

- SHUTTLE owns end-to-end shuttle service
- Airport licenses brand

Roles & Responsibilities

- Brand endorsement
- Access to curb & passengers

Commercial Model

- Passenger pays fare per ride
- 10% annual revenue share to airport

Key Advantages

- Fast time-to-market
- Low risk for airport

BUSINESS MODEL

We offer a Mobility-as-a-Service model that generates up to €69M of annual revenue

Yearly Passengers

Avg. Passenger Fee

Yearly Revenue

With a **10% Revenue Agreement** this means a risk-free **€6.9 Million** indirect revenue stream for MUC

IMPLEMENTATION STRATEGY

Our Implementation Strategy offers a phased rollout to scalable, autonomous operations

MARKETING CAMPAIGN OVERVIEW

Support pilot adoption while strengthening Munich Airport's positioning in innovative and sustainable mobility

Primary Goal

Raise awareness for the new transportation mode to Munich Airport during the pilot launch in Schwabing-West & Maxvorstadt.

Secondary Goals

Convert awareness into trial bookings.
Position MUC as an innovative, sustainable mobility hub.

Timeline: During Pilot

June - September.

Peak airport demand.

Flexible extension based on onboarding performance.

Key Message

Vacation starts at your doorstep.

Keywords: reliable, fair price, convenient, uncomplicated, easy, lifestyle.

Budget: 62k

Vacation starts at your doorstep.

BUYING PERSONA

Lena: Urban Schwabing Millennial who travels smart & often

Urban, digital professional with frequent flights

- 33, Product Manager, lives with partner in Schwabing-West
- Several trips per year - city trips, main vacation & business
- Middle/ upper-middle income - pays for comfort if it's justified
- Mobile-first: organises live via apps, scrolls IG & FB daily

Time-pressed traveler who wants zero friction

- Hates detours to city centre, crowded trains and delays
- Taxi is perceived as too expensive for most private trips
- Most important: reliable arrival, predictable timing, low stress
- Expects clear information & simple planning

Responds to smart, visual & local content

- Discovers new services via IG reels, local Munich accounts & OOH in Munich
- Reacts to messages about savings, comfort & “smart upgrade”, not generic “cheap”
- Needs social proof (reviews, UGC, influencers) to gain trust
- Saves & shares content that is short, visual & easy to understand

MARKETING CAMPAIGN DETAILS

Holistic Launch Campaign Across Online & Offline Channels

Online Channels

Attention (paid reach) + Interest (FAQ/explain) + Desire (trust) → Action (bookings)

Instagram & Facebook - Owned & Paid media

Regular and explanation content on owned accounts & MUC Airport account + paid adds with promo codes driving awareness and conversion.

Attention (social proof) → Desire (brand affinity) + Action (repeat booking)

UGC content with #SkipTheDetour Challenge

UG Stories from customers who “skip the detour”, creating social proof & repeat usage via vouchers.

Attention → Desire (trust transfer) → Action (booking)

Local influencer activation

Local micro influencers & Munich Lifestyle accounts driving awareness and bookings with exclusive discount codes & social proof.

Offline Channels

Attention (city visibility)

On-street brand presence

Branded vehicles driving awareness in Schwabing & Maxvorstadt.

Attention (commuters) + Interest (QR scan)

Banners in stations & streets

Static OOH banners target commuters in Schwabing and Maxvorstadt.

ONLINE MARKETING

Paid ads drive reach & first bookings

12

Paid campaign on IG Stories/Reels (primary) + FB

rolled out over 4 months to drive first bookings with **promo code**.

High reach (paid media) → landing page/app visits → promo code redemption → first booking

Local millennials convert when the benefit is felt fast and stays simple: awareness → understanding → **trust** → trial

1 emotional cinematic hero ad

Track **CPM**, reach, hold rate, frequency, **CTR**, **promo code usage**, completed bookings, **CAC**

Anzeige

ONLINE MARKETING

Local creator accounts make SHUTTTL known in Munich

4 Munich based travel & lifestyle micro creators + 3 local lifestyle accounts with exclusive discount codes (IG Stories/Reels + local lifestyle IG Feeds).

Fast awareness: SHUTTTL shows up where Munich locals actually look for tips - local trust accelerates trial

Content: authentic “I tried it” stories + soft CTA and repost via owned accounts

Track **promo code redemption**, first bookings, reach, value signals (saves + shares), **link taps (UTM)**

ONLINE MARKETING

Explanation & FAQ content turns questions into bookings

Micro Explainer content on Instagram & Facebook

+ Q&A Stories saved as Highlight (FAQs)

#MeetTheTeam (trust)

#HowToBook (clarity)

#RideElectric (clarity)

Booking with SHUTTTL feels safe and effortless

Because trust is built before the first ride.

Track content-to-booking attribution

- Story completion (clarity)
- Value signals (saves + shares)
- Link taps - UTM based (desire)
- Completed bookings (conversion)

ONLINE MARKETING

Lifestyle content that makes SHUTTTL feel local

Neighbourhood lifestyle on Instagram and Facebook
(Feed + Stories) to build everyday visibility in Munich.

SHUTTTL feels “for people like me.”

15

Cinematic everyday scenes: doorstep pickup, calm ride, vacation mood.

Signature line: “Vacation starts at your doorstep.”

Daily-life relevance → emotional connection + brand affinity → intent → trial booking

Track value signals (saves + shares), profile visits, Story completion & follower growth (

ONLINE MARKETING

UGC challenge creates awareness and turns first rides into repeat bookings

UGC Challenge on IG Stories/Reels:

Locals share their SHUTTL ride via **#SkipTheDetour**.

Real people remove the booking barrier:

Social proof (UGC) → desirability (“that’s how locals travel”) → first ride → repeat booking via rewards/code

3 micro-influencer kickoffs + weekly reposts

Best Stories saved as Highlight

DM promo code as repeat booking trigger.

Track **reach, promo code usage, repeat booking rate, cost per repeat booking, attribution.**

OFFLINE MARKETING

Driving local awareness through branded street presence

Branded vehicles driving local awareness in Schwabing & Maxvorstadt.

Call-to-action: “**Book Now**” and **QR code**.

Routes optimized for **high foot and car traffic** & exposure during **peak commute hours**.

Local visibility in neighborhoods → curiosity + recognition → QR scans/app visits → bookings

Control via estimated route impressions, QR scans & signup attribution.

OFFLINE MARKETING

Using humor to capture commuter attention

Static banners in **commute areas (UBahn; Tram; Bus)** of Schwabing & Maxvorstadt.

Simple, high-impact design with large **logo**, **clear branding & CTA**.

Humorous statements highlighting cost & convenience.

Local visibility in neighborhoods → curiosity + recognition → QR scans/app visits → bookings

Control via QR scans and signup attribution.

LIMITATIONS

AI limitations

Inconsistent Branding & design control

Example: Models altered brand colors, typography or vehicel design elements (also despite explicit constraints)

Mitigation: use brand kit, locked color palette and negative prompts

Factual/ visual inaccuracies in multimodal outputs

Example: Displaying text within a video leads to unexpected behavior

Mitigation: Avoid in-video text generation, add text in post-production, change AI

Exaggerated expressions

Example: The model exaggerated the emotion “stressed,” almost leading to a fearful state

Mitigation: Use a newly adapted prompt.

LIMITATIONS

AI limitations

Instruction overload/ prompt saturation

Example: with too many requirements, model priorities some instructions and ignores others (e.g. changed elements we explicitly requested to keep fixed)

Mitigation: Break prompts into smaller steps, use iterative prompting and validate outputs against a checklist after each generation

Limited contextual understanding

Examples: Without a back-view reference image, the model struggled to place the CTA correctly on the van; The model allowed a moving van with an open door.

Mitigation: provide multi-angle reference images and validate placement using brand-check template

Limited spatial reasoning

Example: repositioning tasks (e.g., “move this item slightly to the right”) was difficult/ not possible

Mitigation: Layered editing workflow, change AI

vacation with SHUTTL ?**

Annex

Market Research

Private Bus Provider in Munich	Prices
Lufthansa Express Bus	Single ticket: approx €13.00. or Deutschlandticket
Scharf Buslinien	Single ticket: 2,10 € to 12,60 € or Deutschlandticket
Lufthansa Express Bus - Long Distance	Innsbruck: 59.00 EUR /Nuremberg: 59.00 EUR
The Ingolstadt Airport Express	Single ticket: 27,70 € - 30€ + Subscription Options
FlixBus & RegioJet	Variable but generally low price if bought in advance
Airport - Messe München Shuttle	One-way ticket: 12.50€ or Deutschlandticket
Small Bus/Private Bus for groups	Variable but higher prices

26 No on-demand service for private bus offerings

The Gap

Public Transport: Public transport to the airport takes about 60 minutes on average (including ~15 minutes waiting), roughly twice as long as traveling by car, while private airport buses also involve added access and waiting times, limiting their convenience and reliability.

Car/Taxi: Due to higher time efficiency and perceived reliability, car travel remains strongly preferred, especially among higher-income travelers, even though alternatives exist. However, Around 20% of car users are dissatisfied with high costs,such as ~€100 taxi fares or parking fees of €60–€150.

Unmet demand: This contrast highlights a clear gap between low-cost but inconvenient options and fast, convenient modes that are perceived as too expensive.

Business Calculations

Revenue

Total Addressable Passengers:
43.4M annual MUC passengers × 5% shuttle capture
= 2,170,000 passengers / year

Average Fare per Passenger:
Assumption = €32

Passengers per Van:
4.5 pax/trip × 9 trips/day × 360 days
= 14,580 passengers / van / year

Fleet Size Required:
 $2,170,000 \div 14,580$
= 149 vans (≈150)

Total Annual Revenue:
 $2,170,000 \text{ passengers} \times €32$
= €69.44M

Cost

Driver Costs
 $2 \text{ drivers/van} \times €46,000 \times 150 \text{ vans}$
= €13.80M

Vehicle Leasing
 $€18,000/\text{van/year} \times 150 \text{ vans}$
= €2.70M

Energy (Electricity)
 $€21,800/\text{van/year} \times 150 \text{ vans}$
= €3.27M

Maintenance & Insurance
 $€8,000/\text{van/year} \times 150 \text{ vans}$
= €1.20M

Software & Dispatch Platform
Assumption (routing, app, payments)
= €2.00M

Marketing & Customer Acquisition
 $4\% \times €69.44\text{M revenue}$
= €2.78M

Customer Support & Refunds
 $€1.00 \times 2,170,000 \text{ passengers}$
= €2.17M

IT Infrastructure & Cloud
Assumption = €1.50M

Sales & Partnerships
Assumption = €1.20M

Operational Buffer
 $5\% \times €25.0\text{M core OPEX}$
= €1.25M

Airport Revenue Share
 $10\% \times €69.44\text{M revenue}$
= €6.94M

Total Annual Costs:
= €38.81M

Summary

Total Annual Revenue
= €69.44M

Total Annual Costs
 $€31.87\text{M OPEX} + €6.94\text{M airport fee}$
= €38.81M

Operator EBITDA
 $€69.44\text{M} - €38.81\text{M}$
= €30.6M (≈44% margin)

ANNEX 4 DATA

Average travel times to the airport using public transport clearly shows disadvantaged district

Findings

- The average times are better in district where the S1 & S8 traverses.
- Schwabing Nord has a door-to-door travel time of 67 minutes, supporting the need for a faster, cheaper solution.

Methodology

- Built a map of Munich city districts using official Open Data
- Generated 100 random residential sample points per district
- Used OpenTripPlanner with real public transport schedules
- Calculated door-to-door public transport travel times
- Sampled weekdays and weekends across multiple times of day
- Randomized departure times within each time window
- Aggregated results to average travel time in minutes per district

Scale

Cost Calculation Marketing Campaign

Online Channels

Global assumptions (apply across calculations)

- Campaign duration: 4 months (June–September)
- Pilot area: Schwabing-West + Maxvorstadt
- Promo codes are counted as marketing costs only when redeemed
- Discount cost = number of redemptions × discount value

Paid IG & FB Ads (June–Sep)

Assumptions

- Media budget: €2,000 per month
- Duration: 4 months
- Promo code value: €10
- Promo code validity: 7 days
- Expected paid-code redemptions: 350 total

Calculation

- Media spend: $€2,000 \times 4 = €8,000$
- Promo discount cost: $350 \text{ redemptions} \times €10 = €3,500$

Total Paid IG & FB Ads : €8,000 + €3,500 = €11,500

Lifestyle IG & FB Feed & Story posts (Owned content) (June–Sep)

Assumptions

- Owned channels → no media spend
- Number of posts: 12 total (3/month × 4 months)
- Production cost per post: €50

Total Owned Lifestyle Content : $12 \times €50 = €600$

Explanation video series (IG & FB) (June–Sep)

Assumptions

- Number of micro-videos: 8
- Format: 10–25 sec vertical reels optimized for Stories/Reels
- Production workflow: GenAI + editing + subtitles + CTA frame
- Production cost per micro-video: €180
- One-time template setup: €300 (brand intro/outro, typography, subtitle format)

Calculation

- Micro-video production: $8 \text{ videos} \times €180 = €1,440$
- Template setup: €300

Total Total Explanation Video Series: €1,440 + €300 = €1,740

Cost Calculation Marketing Campaign

Online Channels

Lifestyle accounts Story + Feed post (July) — 3 accounts (200k followers each)

Assumptions

- Number of lifestyle accounts: 3
- Collaboration fee per account package: €1,000
- Feed post: €600
- Story bundle: €400
- Promo code value: €15
- Promo validity: 2 weeks
- Forecast redemption per account: 70 redemptions ([funnel model to the right](#))

Calculation

- Collaboration fees: $3 \times €1,000 = €3,000$
- Promo discount cost: $3 \times 70 \text{ redemptions} \times €15 = €3,150$

Total Lifestyle Accounts: €3,000 + €3,150 = €6,150

Redemption model (per lifestyle account)

Assumptions

- Followers: around 200,000
- Reach rate (post+story mix): 15%
- CTR from reached users: 1.5%
- Click-to-booking conversion: 12%
- Long-tail uplift due to 2-week validity: +30%

Calculation

- Reach: $200,000 \times 15\% = 30,000$ reached users
- Clicks: $30,000 \times 1.5\% = 450$ clicks
- Base redemptions: $450 \times 12\% = 54$ redemptions
- Long-tail uplift: $54 \times 1.30 = 70.2 \approx 70$ redemptions

Cost Calculation Marketing Campaign

Online Channels

FAQ – Stories on IG (June–Aug)

Assumptions

- FAQ story cards: 12 total
- Production cost per card: €30

Total FAQ Stories: $12 \times €30 = €360$

Integration “Tips”-Feed posts MUC Airport (July–Aug)

Assumptions

- Owned channel → no media spend
- Number of posts: 6
- Production cost per post: €30

Total MUC Tips Integration: $6 \times €30 = €180$

#SkipTheDetour UGC Challenge Incentives (July–Sep)

Assumptions

- UGC discount value: €15
- Expected UGC redemptions: 160 total (analog to calculation for Life-Style account)

Total UGC Incentives: $160 \times €15 = €2,400$

32

Influencer travel stories (July–Aug)

Assumptions

- Creators: 4
- Fee per creator package: €500
- Promo value: €15
- Promo validity: 24h
- Expected influencer redemptions: 120 total (analog to calculation for Life-Style account)

Calculation

- Creator fees: $4 \times €500 = €2,000$
- Promo discount cost: $120 \times €15 = €1,800$

Total Influencer Travel Stories: $€2,000 + €1,800 = €3,800$

Influencer Kick-off UGC Challenge (July)

Assumptions

- Kick-off micro-creators: 3
- Fee per creator: €500

Total Influencer UGC Kick-off: $3 \times €500 = €1,500$

Cost Calculation Marketing Campaign

Online Channels

TOTAL ONLINE MARKETING COSTS

- Paid IG & FB ads → €11,500
- Life-style IG & FB Feed & Story posts (Owned) → €600
- Explanation video series (8 micro videos) → €1,740
- FAQ – Stories on IG → €360
- Integration “Tips”-Feed posts MUC Airport → €180
- IG Munich Life-Style accounts Story & Feed post (3 accounts) → €6,150
- Influencer travel stories → €3,800
- Influencer Kick-off UGC Challenge → €1,500
- #SkipTheDetour UGC Challenge incentives → €2,400

Total Online Marketing Budget €28,230

Cost Calculation Marketing Campaign

Offline Channels

On-street brand presence

Full vehicle wrap: 1500€ - 5000€ ([link](#))

Driver: Gross hourly wage of 29,63 € (EUR)/hr ([link](#))

Operating time: 4 h/day × 5 days/week ≈ 80 h/month

Fuel assumption: ~80 km/day urban driving; ~1,600 km/month; Avg.

fuel cost ≈ 1.70 €/L, consumption ~7 L/100 km; → ~190 €

fuel/month per car (rounded to 200 € for buffer)

Monthly Cost Breakdown

- Month 1 (2 cars, incl. wrap): Vehicle wraps: 6,500 € + Driver wages: 4,800 € (2 × 80 h × 30 €) + Fuel: ~400 € (2 × 200 €) = ~11,700 €
- Month 2 (2 cars, no wrap): Driver wages: 4,800 € + Fuel: ~400 € = ~5,200 €
- **Total Costs (2 Months): ~16,900 €**

Banners in Stations & Streets

Objective: Near-full awareness coverage in Schwabing & Maxvorstadt

Channels covered: U-Bahn stations, major tram stops, high-frequency bus stops

Estimated inventory needed: ~55 A1 banners (district saturation level)

Campaign duration: 4 months (≈120 days)

Average cost: ~€2.50 per banner per day (based on Munich PT pricing)

Total Costs: ~€16,500

Buying Persona

Core Profile

Name: Lena Müller

Age and gender: 33, female

Job: Product Manager in a tech start-up in the city center of Munich

Income range: Net household income 4.500-5.000€/ month (with partner)

Location: Munich, Schwabing-West (close Hohenzollernplatz)

Background

Short bio:

Lena lives with her partner in Schwabing-West and works as a product manager at a technology company in the city center. She travels a lot—professionally for two to three conferences/workshops a year and privately for several weekend trips plus a longer vacation. She is organized, likes to plan efficiently, and uses digital tools to optimize her everyday life. For her, travel is part of a moderate, urban lifestyle—but without unnecessary stress and annoying detours. So far, she has been using a combination of the S-Bahn and occasionally taxis. The big drawback: from Schwabing, she first has to return to the city center, change trains with her luggage, and deal with unreliable trains—while a taxi is convenient but painfully expensive at around €100 per trip. She wants a smart, reliable, and fair alternative.

Lifestyle and values:

- Loves city trips, new restaurants and cafés in Schwabigen, yoga, concerts
- Likes to invest in experiences and comfort, but doesn't want to throw money out the window
- Values: efficiency, self-determination, sustainability, “smart instead of flashy”
- Sustainability is important to her—not extremely dogmatic, but she tries to make CO2-intensive decisions more consciously
- Likes “smart” solutions: sharing, apps, modern mobility

Professional context:

- Works in an agile tech environment, is accustomed to working with tools, apps, and KPI dashboards
- Regular business trips to customers and conferences, sometimes with tight schedules—especially during the week, often early in the morning (6–9 a.m.) or late afternoon/evening (4–7 p.m.)—very close to the peaks of the leisure solo traveler + business budget/classic segments
- Employer is open to modern mobility offers (bike leasing, public transport subsidies, etc.)

Audience Insights

Goals:

- **Short-term goals:**
 - Get to the airport quickly, reliably, and stress-free—especially for early and late flights
 - No driving back and forth through the city center, but the most direct route possible from Schwabing to the airport
 - Fair price below taxi rates, but with more comfort than the S-Bahn/public transport
- **Long-term goals:**
 - Establish a standard workflow for your air travel: “This way, I always get to the airport without having to plan everything from scratch every time.”
 - Make your travel more sustainable without feeling restricted
 - ZSave time and mental energy so you can use it for the actual trip
- **Key drivers and priorities:**
 - Time savings & predictability
 - Comfort (seating, quiet, space for luggage)
 - Value for money (not cheap, but “reasonable”)
 - Sustainability & modern lifestyle/innovation
 - Digital convenience: app booking, tracking, clear information

Barriers:

- **Practical challenges:**
 - She has to take the S-Bahn back to the city center, even though she already lives near the airport
 - Changing trains (subway → commuter train), stairs with suitcases, and crowded trains
 - Early and late flights, where public transportation connections are less convenient
 - Taxis are expensive (approx. €100) and seem oversized
- **Emotional frustrations:**
 - Feeling like you're wasting time
 - Stress about whether you'll arrive on time using public transport (delays/disruptions)
 - Discomfort in crowded trains with luggage and strangers
 - Frustration about the lack of “smart” options
- **Obstacles to success:**
 - Skepticism toward new mobility startups
 - Fear that the shuttle will arrive late/get stuck in traffic
 - Uncertainty about routes, prices, booking rules (cancellation, flight delays)
 - Habits: previous standard modes of transport (taxi or suburban train) are “well-established”

Behavior and Personality

Personality traits:

- Organized, efficient, solution-oriented, forward-thinking planner
- Tech-savvy, curious about new apps and services—but risk-sensitive when it comes to critical issues (flights, time)
- More pragmatic than extremely frugal—focused on value for money, not the lowest price
- Socially active, shares experiences on Instagram (Stories and occasional posts/reels)

Daily routine description:

Working days:

- Mornings: Coffee at a café in Schwabing or at home, social media check (IG)
- Commutes to the city center by subway or bike
- During the day: Lots of screen work, meetings, Slack/Teams
- Evenings: Yoga, dinner with friends, TV series, scrolling through Instagram/TikTok before bed

Travel days::

- Plans trips in advance, checks flight times, books everything online
- Gets up early, wants to get to the airport as smoothly as possible
- Uses smartphone for check-in, boarding pass, navigation while traveling
- Flights often between 7–10 a.m. or 6–8 p.m. → Check in beforehand, everything digital

Buying / decision-making patterns:

- Researches online (Google, Instagram, reviews) and then makes decisions relatively quickly
- Strongly influenced by social proof: reviews, recommendations from friends and influencers they trust
- Enjoys trying out new services with introductory discounts—stays if the experience is convincing
- Does not compare every detail, but makes intuitive decisions based on: convenience, brand/design/tech feel, key figures (price, time)

Tech proficiency:

- Uses several apps daily (banking, mobility, food, fitness)
- Feels secure with app bookings, online payments, R-Tickets
- Smartphone is their primary planning and booking channel

“*I live in Schwabing—why do I have to go to the city center first to get to the airport? Give me a direct, reliable solution at a fair price, and I'll be a regular customer.*”

Journey and Brand Relationship

Awareness stage	- Insta-Reel “Shuttle vs. S-Bahn” (organic or paid) - Insta-Story from a local Munich lifestyle account - OOH/poster or screen in Schwabing /“Why go backwards to go to the airport Initial reaction: Interest + skepticism (Sounds good - does it really exist yet?)
Consideration stage	- Visits Instagram page & landing page - Watches explanatory videos (“How it works”), checks price, time savings, and service features - Reads 2-3 reviews or story posts from real users - Checks whether their offer fits their next planned flights (dates, times, pick-up area Schwabing) - Checks FAQs
Decision triggers	- Clear time advantage vs. S-Bahn (approx. 35 minutes, no changing trains in the city center) - Fixed price or transparent pricing with introductory offer (e.g., 20% discount/fixed price below taxi fare) - Exclusive added value: with own waiting area at the airport with Wi-Fi, seating, power outlets, coffee, and visual professionalism (app screens, electric vehicles, etc.) - Visible reliability: rating, punctuality/reliability promise, handling of flight delays and automatic rebookings, realistic buffers
Post-purchase behavior	- Share your experiences on Insta Story (photos from the shuttle or exclusive waiting area) - Tell friends and colleagues about the experience - If everything went smoothly: save your app and use it again automatically on your next flight
Loyalty drivers	- Consistent reliability and predictable travel times - Simple booking process + good user experience in the app and on site (live tracking) - Noticeable advantages: always a quiet seat, pleasant atmosphere, exclusive waiting area at the airport (coffee, power outlets, quiet area), no detours, electric vehicle (I'm doing something good) - Loyalty program/credits (e.g., every 5th trip cheaper, points for CO2 savings) + cooperation with employer
Current view of your competitors	- Suburban train/public transport: “Cheap, but annoying, unreliable, uncomfortable with luggage.” - Taxi/ride-hailing: “Comfortable and fast, but the price hurts, so only for emergencies or if the company pays for it.” - Traditional airport bus: “Okay, but only useful if on time, risk of overbooking.”
Desired brand experience	- Modern, digital “Munich 2026” instead of “traditional bus company” – “Smart, urban, sustainable – but down-to-earth” - Service that fits naturally into your travel workflow (app-first, push notifications, clear information) - Feeling of being a “smart traveler”: not VIP in the sense of luxury, but VIP in the sense of intelligent solutions (electric, quiet vehicles with direct routes, small community of like-minded travelers) - The brand should: communicate transparently, honestly, and reliably; take sustainability seriously; be visually clean, urban, and “Instagrammable” (shuttle + waiting area as a photo opportunity)

Target Research Millennials - Motivation & Offline Marketing

People in Germany recommend brands mainly when they like the product (49%) and like the brand (41%) - so our campaign focuses on building brand affinity and product confidence through local creator storytelling and lifestyle content. Importantly, discounts / gifts are a top driver (29%), which directly supports our use of promo codes (paid ads + creators+ UGC challenge) as a concrete activation mechanic. In addition, product testing (27%) validates our “I tried it” creator content, pilot-trial framing and promo code for UGC challenge, while valuable content for friends (19%) supports our UGC challenge approach designed to generate shareable social proof.

Out-of-home advertising is a high-reach non-digital channel in Germany: 34% of the target audience report having encountered advertising in “advertising spaces on the go” within the past four weeks. This confirms OOH as a high-visibility channel for building local awareness during commuting and urban travel.

Statista

Influencers and content creators embody authenticity and trust on social media and are therefore popular advertising partners for companies. Thanks in particular to their direct approach and wide reach on social networks, collaborations with content creators are becoming increasingly important, especially when it comes to reaching digitally savvy target groups.

Statista

Almost 30% of German Millennials report having purchased something due to influencer advertising, making creator content a proven conversion lever. This supports our decision to invest in Munich-based micro creators and local lifestyle accounts, as our core target group (urban, digital Millennials) is demonstrably influenced by creator recommendations.
